Fact Sheet

5 Days BCM Implementer Training under the UAE BCM Standard
(AE / SCNS / NCEMA 7000: 2015)

Course description

This training course is designed to provide thorough training in implementing Business Continuity Management (BCM). It covers the need for an organization to deliver its prioritized activities during an emergency or disruptive event, and the steps involved for recovery. This course will provide participants with an understanding of the stages of the NCEMA BCM Action Model. It will help them comprehend the steps, roles and responsibilities, skills and expertise required to implement and support an effective BCM Program in order to safeguard the interests of the organization as well as the community at large.

Training methodologies consist of instructor-led power point slides, as well as individual/group exercises based on a case study. Participants will benefit immensely from the concept of "group learning and sharing" of experiences and also get tips about smart ways to implement BCM, based on case studies and real-life experiences.
