

Kenja is a Japanese software company that specializes in GRC. Kenja was started in 2011 and is the first cloud collaboration software in Japan. We work with enterprises such as TUV for certification and auditing.

With the pandemic, we understand that you may be looking for a quick solution to upgrade your BCP / Audit plans. One way you can achieve this is by making your plan responsive to changing situations.

Kenja Rooms helps your teams — especially remote and geographically dispersed teams — which are facing lots of challenges streamlining their workflows and improving collaboration.

Why Kenja :

- Enhance Resilience
- One platform
- Collaborate your BCM documents in real-time
- Boost Productivity
- Enhanced Security
- Enhanced Project Management
- Improved Communication
- Streamline the workflow of teams.
- Better scheduling
- Better remote working possibilities
- Secure centralized document storage with automatic version control

We have planned and executed strategies that worked very well for other companies and we would love to share the same with you. We would like to schedule a free demo with you to showcase the power of Kenja Rooms. Please write back to us to book FREE DEMO
